## Elastoflex® W is pure relaxation.

**Working, chilling, sleeping – Elastoflex® W is at the heart of all relaxation.**

These moulded flexible foam systems are distinguished by their variety of applications which meet even the highest demands. Moulded products made of Elastoflex® W are highly resilient and perfect for long-term use – two key factors which ensure that we can truly relax whether sitting on a chair or sofa or lying in bed and resting. Moreover, the good flowability of Elastoflex® W systems provides manufacturers of moulded parts with enormous freedom of design. In addition Elastoflex® W can also be foamed around metal or wooden inserts giving the furniture the necessary stability.

### Count on the outstanding properties of Elastoflex® W

- Moulded density
  - from 35 kg/m<sup>3</sup> to 55 kg/m<sup>3</sup> for upholstered furniture
  - from 45 kg/m<sup>3</sup> to 65 kg/m<sup>3</sup> for office furniture and mattresses
- High elasticity, good flowability
- Excellent long-term characteristics
- Open-celled, crush-free for office furniture
- Low emissions
- Pleasant feel
- Flame-retardant alternatives and versions containing renewable resources are available
